Abstract

Posters are widely used in the academic community, and most conferences include poster presentations in their program. Research posters summarize information or research concisely and attractively to help publicize it and generate discussion. The poster is usually a mixture of a brief text mixed with tables, graphs, pictures, and other presentation formats. At a conference, the researcher stands by the poster display while other participants can come and view the presentation and interact with the author.

1. Introduction

NAMORADOS DEL ANÁLISIS y sin embargo caóticos. No hay nada que nos guste más que una gráfica.

Figure 1: Una gráfica siempre viene bien en el póster.

What makes a good poster?

- Important information should be readable from about 10 feet away
- Title is short and draws interest
- Word count of about 300 to 800 words
- Text is clear and to the point
- Use of bullets, numbering, and headlines make it easy to read
- Effective use of graphics, color and fonts
- Consistent and clean layout
- Includes acknowledgments, your name and institutional affiliation

A	B	C	Resto
44.2	5.1	6.1	2.3
712.2	8.3	99.2	3.1

2. Outline

WHERE DO I BEGIN? Before try to answer these three questions:

1. What is the most important/interesting/astounding finding from my research project?
2. How can I visually share my research with conference attendees? Should I use charts, graphs, photos, images?
3. What kind of information can I convey during my talk that will complement my poster?

Figure 2: Incluso más de una, para comparar.

Some formulas are wellcome, but with moderation

$$\begin{aligned} &\text{minimize } \sum_{j=1}^m w_j \cdot x_j \\ &\text{subject to } \sum_{j: e_i \in S_j} x_j \geq 1, \quad i = 1, \dots, n \\ &\quad x_j \in \{0, 1\}, \quad j = 1, \dots, m \end{aligned}$$

3. Sections And Organization

IT'S EASIEST TO BREAK DOWN all the information you want into distinct sections, such as Background, Objectives, Methodology, Results, and Recommendations. A typical poster will have 4-8 of these sections laid out in 3 or 4 columns, but the specifics of your research will dictate which sections are important to include. Posters are read from left-to-right and top-to-bottom, so make sure to lay out your sections so they can be read in order.

Una tabla ilustrativa de lo que se avecina

Day	Min Temp	Max Temp	Summary
Monday	11 °C	22 °C	A clear day with lots of sunshine. However, the strong breeze will bring down the temperatures.
Tuesday	9 °C	19 °C	Cloudy with rain, across many northern regions. Clear spells across most of Scotland and Northern Ireland.
Wednesday	10 °C	21 °C	Rain will still linger for the morning. Conditions will improve by early afternoon and continue throughout the evening.

Una tabla a veces muestra mejor las cosas
